High-quality terracotta sunscreens combined with outstanding glazes make every façade unique and superb in appearance. These specially developed glazes are eye-catching due to their rich colour shades and exceptional textural effects. By using natural clay, pigments and a variety of combinations of minerals in our artisanal and sustainable manufacturing processes, we generate the best results for you. This is the motivation for the cooperation between Argeton GmbH and Koninklijke Tichelaar.

The Barros Supreme Collection to excite and inspire you!
